Work Experience(9 Years)

28 September 2020 - Present

Kulicke & Soffa(K&S), Netherlands & Singapore(Payroll Company-Asm Technologies)

Software Developer in C++ stack for Kulicke & Soffa's Electronic Assembly robots and Wire bonders. For K&S, Netherlands worked on Pick and Place machines(iFlex, PixaLux and Luminex). Presently working for K&S, Singapore on Wire Bonding machine(RapidPro)

-> Wire Bonder, K&S, Singapore

- Worked on adding new features and bug fixes for Rapid pro and ATPP machines used for wire bonding on C++ code base.

->iFlex, K&S, Netherlands

- Worked on code quality improvement projects namely PVS warning fixes, Compiler level warning upgrade from W3 to W4, IWYU(Include What You Use) concept implementation for iFlex, Replacement of boost api's with C++ standard library.
- Worked on redesign of Machine Configuration Tool(MCT, C#/WPF) to implement product decoupling.
- Implemented support for Luminex and CX in MCT, C#,WPF based project used to generate configuration files for iFlex-T2/T4/H1/CX, Luminex and PixaLux.
- Implemented support for MQTT protocol in MCT for smart factory project.
- Worked on bug fixes for iFlex.

2 July 2018 - 25 September 2020

Quest Global Technologies Pvt. Ltd, Bangalore, India

Software Developer in C++/Python/C# stack for KLA(ICOS)'s Packaged IC Inspection machine, T3 and T7 machine.

- Implemented a simulator for ICOS T800 Gantry System , in Python for simulating the Hardware which is a TCP/IP Server accepting connection from the client and sending reply to the client. Extended Gantry client executor to handle commands received from GUI or the Client Script and parse the input command for Query and Setting Parameter.
- Implemented feature to generate new log files for customer specific data like number of tape jobs finished per month, and taper related parameters logging.
- Implemented dedicated 'ignore pockets with pickup problems' setting per Pick and Place head. Made changes to enable / disable the feature "ignore pockets with pickup problems" independently for YZ1, YZ2 and YZ4.
- Worked on SECS/GEM based project to fetch settings file using SECS/GEM protocol for Intel .
- Worked on Bug fixes and writing integration tests in Python.

Software Developer in C++/C stack,SIP protocol for Reliance Jio's ONT router team

- Implemented LibWebSocket Server with Smart Speaker as client. Smart speaker is embedded device newly added to ONT.
- Implemented new handler For Whitelisting sip client.

16 May 2016 - 28 June 2020

AxisCades AeroSpace & Technology Pvt Ltd, Bangalore, India

Software Developer in C++/Qt for AxisCades Aerospace.

- Worked on Bird Detection Radar,implemented real time 2-D graph plotting with help of QCustomPlot API.
- Contributed to Aircraft Recognition Training System, GUI development and maintenance support.
- Lead team of 5 and commissioned ACRT to 37 units of Indian Army/Indian Air Force

Education

06/2024 — Present

Indian Institute of Technology(IIT-J), Jodhpur, Rajasthan, India

Master of technology(M.Tech), in AI (Currently Pursuing)

06/2011 — 05/2015

JSS Academy of Technical Education,Noida,UP,India

Bachelor of technology(B.Tech), in Information Technology

- Awarded Bachelor of Technology (BTech) ,a professional undergraduate engineering degree programme by completing four years of study in the Information Technology field.

2008-2010

GN National Public School,Intermediate(10 +2)

2007-2008

GN National Public School, High School(10th)
